REPLACEMENT INSTRUCTIONS FOR 3-WAY BRASS BALL VALVE

Tools Needed: 10mm hex wrench, two 12 inch adjustable wrenches, pliers and two small flat head screwdrivers. If you have additional questions, please call 888 364 6242 and ask for Tim V.

Step 1: Remove face plate, blue hoses and lower plastic retainer strap (sliding to the left).

Step 2: Loosen and remove both female chrome garden hose fittings.

Step 3: Remove entire right hand lower corner of plumbing fixture.

Step 4: Remove rear fitting from valve.

Step 5: Remove top fitting from valve using 10 mm hex wrench.

Step 6: Remove bottom fitting (paying close attention to gray washer), remove washer from old valve and place into new valve.

Step 7: Assemble unit in reverse order of removal.
